

Supplementary file 8: Samples collected by type of outlet in prevalence surveys	
<i>Because of the limited number of samples tested for quality in the studies included in this review, the figures should not be interpreted as representative of the prevalence of specific SF antiretroviral medicines (please refer to the discussion section of the current paper for more details)</i>	
Type of outlet	Failure rate % (n/N)
Private pharmacy	28.0% (7/25)
Hospital/health centres	19% (8/98)
Website	7.7% (2/26)
Government outlets – others*	6.3% (1/16)
Combination of outlets	2.2% (29/1,302)
Ports of entry	0.0% (0/2,200)
Manufacturer	0.0% (0/17)
Non-governmental organization	0.0% (0/7)
Wholesalers/importer/distributors	0.0% (0/1)
Unknown	19.0% (4/21)
Total	1.4% (51/3,713)
<i>*included: government pharmacies and other public health facilities</i>
